

## Sizes:

The most ideal solution is of course to try them on "on the spot", but unfortunately this is not always possible.

We certainly have size charts, one of which you can also find on this page, but these charts can never cover all eventualities and are more of an initial size estimation.

You are also welcome to provide us with the following data:

-Man / Woman  
-Intended use

-body size  
-body weight  
-Chest circumference  
-belly circumference  
-Po - Scope

Based on this data, we can definitely give you a size tip. [info@seacenter.de](mailto:info@seacenter.de)

But at the end of the day, YOU have to feel comfortable in it, one likes it more comfortable and the other likes the pressed sausage version :-)

We have a large number of images, including body data, which have been provided to us by customers. I am happy to pass this information and images on to future customers.

But you can take a look at some pictures in advance, including body data, so you at least have a relatively good idea of the size and how the Neo might look on you.

We can also talk about your choice of size. [info@seacenter.de](mailto:info@seacenter.de)

These are not professional model pictures, but pictures provided by our customers, please note this.

Different colors of the Neos are sometimes shown, but it is the identical model.

An identical full-body neo can also be used for assessment as a shorty, and vice versa of course. And, of course, we are always happy to receive pictures of you and the suit, as long as we are allowed to use them, perfect!

Grösse	Körpergrösse	Brustumfang Person	Brustumfang des Neos
4XL	bis 194cm	111cm - 122cm	113cm
5XL	bis 195cm	115cm - 129cm	117cm
6XL	bis. 200cm	120cm - 138cm	122cm
7XL	bis. 200cm	126cm - 150cm	128cm
8XL	bis. 200cm	130cm - 160cm	132cm

**Mario in a 4XL shorty**

- body height 189 cm
- body weight 110 kg
- Chest circumference 127 cm
- belly circumference 129 cm
- Butt circumference 118 cm

My opinion:

The neo could actually be at least one size smaller, but he wanted a neo for jet skiing that was more comfortable.

**Jutta 5XL Shorty**

- Height: 160cm
- Body weight: 118kg
- Waist circumference 130 cm,
- Hip 144 cm,
- Chest 128 cm,
- Thigh 77 cm

My opinion:

Too long, a little wide in the shoulder area, but this is normal for a men's suit and the small body size. The main body parts are tight-fitting, so great!

### Jürgen 6XL Shorty

- Body height: 172 cm
- Body weight: 122 kg
- Chest circumference: 130cm
- Po -scope: 132
- Waist circumference: 138cm
- Neck circumference: 48cm
- Shoulder circumference: 128cm

My opinion:

I think the Neo fits well, it could be a bit tighter on the arms and legs, but a size smaller would make it a bit tighter on the stomach. A 5XL would be possible in my estimation.

### **Sven 7XL Shorty**

**Height: 169cm Body**

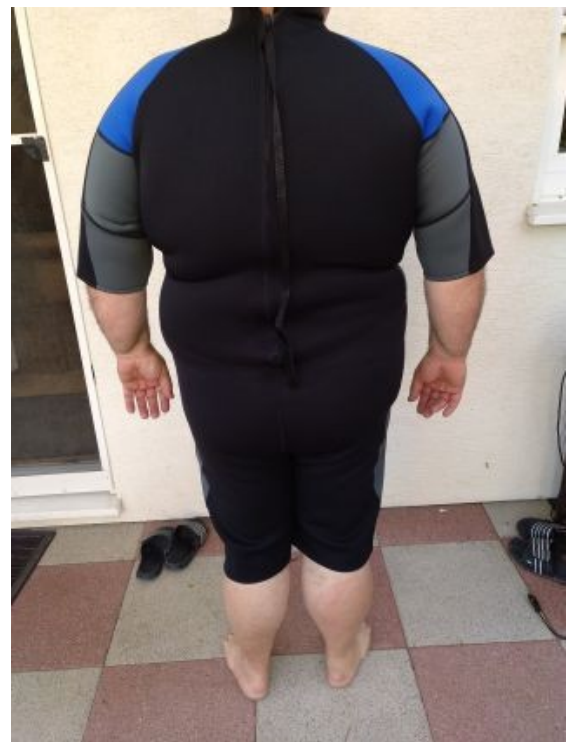

**weight: 140 kg**

**Chest circumference 148 cm**

**Belly circumference 150 cm**

My opinion:

Too long and too wide at the arms and legs, but the essential parts of the body are "tight", therefore fits !

Miriam in a 4XL shorty

- body height: 165cm
- Body weight: 110 kg
- Chest circumference: 130cm
- Waist circumference: 120cm
- Po circumference:

140cm My opinion:

Too long and too wide at the arms and shoulders,  
but the essential parts of the body are  
"tight", so it fits !

Brigitte in 6XL Shorty

- body height: 170cm
- Body weight: 140 kg
- Chest circumference: 137cm
- Waist circumference: 150cm
- Po circumference:

145cm My opinion:

A little too wide at the shoulders,  
but the essential parts of the body are  
"tight", so it fits !

**Annika 4XL Shorty**

**Height:**  
**171cm** **Waist:**  
**108cm** **Butt:**  
**143cm** **Chest:**  
**118cm** **Belly**  
**120cm**  
**Underbust 104cm**  
**Thigh thickest part 73cm** **Upper arm**  
**thickest part 40cm**

My opinion: Almost

perfect!

Yes, it is the corresponding full-body neo, but the cut is identical to the shorty.

Klaus has a pronounced stomach and upper body area and, in comparison, narrow legs and arms.

Klaus was there and my first guess was 6XL.

Yes, it also fitted, but of course too long (more noticeable with a full suit than with a shorty), but especially much too wide at the legs and arms.

So 5XL, also fit...but still a bit too wide on legs and arms. You can see 4XL in the pictures!

I only have the height and weight, but I estimate the waist circumference to be around 145cm, possibly a little more.

Of course, at some point closing the suit alone becomes problematic, but it worked very well on its own here.

This is just an example of how stretchy our suits are! Certainly not transferable to all customers, but worth mentioning.

-body height 180 cm

-body weight 145 kg
